

Save Energy and Save the Environment.

RHINO ROOF PROTECTION COATINGS utilize environmentally friendly and extremely low VOC Roof Coatings. By using our products, it enables us to reduce landfill materials because at least 10% of landfill waste is made up of roofing materials. In addition, we use an Aruba Primer. This high quality primer is made with recycled rubber particles. Our products save energy, both for the building/homeowner and for the utility companies. RHINO ROOF PROTECTION COATINGS reduce the carbon footprint of the building by reducing the CO2 emissions and minimizes the environmental burden.
